

What are the benefits of using the Data Archive?

- It is a UNSW owned and managed facility that is free of charge for all UNSW researchers (staff and High Degree Research (HDR) candidates).
- It is safe and secure. All data will only be stored at a UNSW datacentre with an additional back-up of data stored in a secure site off campus, so your data will always remain safe and accessible. See also the [When should I delete / remove the local copy of my data? FAQ](#).
- It complies with UNSW [policy](#) and [procedure](#) for the storage of data.
- It provides a secure space to view and share data.
- There is no quota limit.
- HDR candidates can store data in **Private** or **Shared** (with supervisor and others) folders, making it easy for associated research groups to access data in one secure location.
- Data are only available to members identified in the specified [Research Data Management Plan \(RDMP\)](#).

Help and further information:

- To learn more about the Data Archive:
 - go to the [Start here](#) page
 - see all [Help Topics](#)
 - see all [Frequently Asked Questions \(FAQs\)](#)
 - browse through the carousel on the [homepage](#) to view all available videos
- To access the Data Archive Web application, use this [link](#), or, go to the [Home](#) page for other access options
- To create, or update, a Research Data Management Plan go to the [ResData](#) service
- **Note:** the Data Archive service is also available over SFTP, see the [SFTP client guide](#) for more information
