

## What do I put on my grant application?

See also: What are the Australian Research Council (ARC) requirements?

All UNSW researchers have access to <u>ResToolkit</u> to create and register a <u>Research Data</u> <u>Management Plan</u> (<u>RDMP</u>). The <u>RDMP</u> is integrated with the UNSW Data Archive - you must have a RDMP to obtain a storage allocation in the UNSW Data Archive.

Researchers are also strongly encouraged to plan for their project data to be deposited in discipline-specific repositories where these are available. See Where can I share and find research data? for more information.

So as a minimum, you can include statements such as:

- "UNSW has implemented a data storage solution for every stage in the life cycle of a research project."
- "The UNSW Data Archive will be used to store the data for this project for at least 7 vears"
- "The data management plan for the project will be established using UNSW's ResData portal."
- "Data will be archived using UNSW's Data Archive (or other archive mechanism as applicable)."
- "Data will made discoverable by registration on Research Data Australia (and/or discipline-specific registries where applicable)."

An example of a full statement on using the Data Archive could be:

"Access to data files will be password protected, with access restricted to project personnel. The UNSW servers are located in a secure data-centre, whereby physical access requires a swipe card or specially keyed master code. Swipe access is restricted to IT staff who have a need to access these rooms, and are encoded for access by security personnel. The room is protected by double-door airlock system, with both sets of doors independently secured. Console access to servers is password protected and requires VPN software with 2 factor authentication. Passwords for remote access to servers are required to be highly complex, and are expire every 6 months. Offsite tape storage is managed by reputable tape management companies."

## Help and further information:

- For what to say about where your data is stored see Where can I say my data is stored on a grant or ethics application?
- To learn more about the Data Archive:
  - o go to the Start here page
  - o see all Help Topics
  - see all Frequently Asked Questions (FAQs)
  - o browse through the carousel on the homepage to view all available videos
- To access the Data Archive Web application, use this <u>link</u>, or, go to the <u>Home</u> page for other access options
- To create, or update, a Research Data Management Plan go to the ResToolkit service
- **Note**: the Data Archive service is also available over SFTP, see the <u>SFTP client guide</u> for more information
